

## NEW JERSEY

**Bulltown Rd** in Southern New Jersey off of Route 542 10 miles East of Hammonton. Park at the Basco State Park main parking area. Roller ski on the Bulltown Rd. which forms a 6 mile 'U ' on the North side of Route 542. The pavement on the first few miles is semi rough blacktop, great for double poling. The last half of Bulltown is ideal smooth blacktop, great for skating. The speed limit is 35mph, cars are few, deer are more of a danger and all the road is through a nice pine forest with only a few houses. It is pretty flat, so high resistance wheels are recommended if you want a decent workout. *-John*

**High Point State Park Rt. 23, 10 min. from Port Jarvis.** A nicely paved 3K hilly trail with fantastic views of NJ, NY and the PA Appalachian Mountains. The place has remained mostly undiscovered for roller bladers / bikers & motorists. In winter the trail is groomed for X-C skiing. Known as the Scenic View Trail. *-Andrey Revyakin*

**Morristown:** Loantaka Park, Accessible from a parking lot on South St., Morristown, or from Kitchell Road. Paved bike path about five miles with slight elevation changes. Popular place in nice weather, be prepared to share! *-P.M.*

**Piscataway:** A good place for roller skiing is Johnson Park at Route 514, River Road, Piscataway (right in front of Rutgers Stadium). Pavement is very smooth, cars quite rare (speed limit is 25 mph). Terrain is flat, so no need to worry about stopping. The only draw- back is the length - just about two miles (actually the road goes further, but the pavement turns bad) Take NJ turnpike, exit 9, Rt. 18 North, go up to the end of Rt. 18, make a left onto River Rd. (right after crossing the bridge over Raritan River, and make a left at the first traffic lights (Landing Lane). About 7 Min. from exit 9.

**Rockaway Township: "Lake Denmark RD."** At the intersection of Lake Denmark and Snake Hill Roads in Rockaway Twp., adjacent to Picatinny Arsenal. You can get in a 1.5 -2 km climb up Lake Denmark Rd. to the arsenal entrance. You can also go the other way out Lake Denmark Rd. towards Green Pond Rd. on a section that is newly paved, although that may change as commuters discover it's been changed from dirt to pavement. You do have to be careful because there is NO SHOULDER and it's narrow in places. Note: Speed reducers or slower speed roller skis are recommended if you wish to ski all the way to the top of the hill and wish to ski back down. *- Pete Minde*

**Upper Greenwood Lake:** The access road in Wawayanda State Park is two miles long from the welcome building to the far edge of the boat launching parking lot. The surface conditions range from perfect to moderate. Traffic on weekdays is remarkably light. The topography is fairly flat with a few "false" flats and one or two grades that require a bit of muscle and sweat to get over. Park at the far edge of the boat launch. Good Luck. P.S. You might even see a bear or two. *-Kevin*
